National Geographic - African Lion

What is the African lion? It is the second-largest living big cat after the tiger. Males are unique among the cat species for their thick mane of brown or black hair encircling their head and neck. The mane darkens with age, and the thicker and darker a mane is the healthier the cat.

Lion | African Wildlife Foundation

African lions live in scattered populations across Sub-Saharan Africa. The lion prefers grassy plains and savannahs, scrub bordering rivers and open woodlands with bushes. It is absent from rainforest and rarely enters closed forest.

Lion - Wikipedia

Le lion est le deuxième plus grand félinidé, après le tigre, et ainsi le plus grand carnivore d'Afrique. Un mâle mesure de 172 à 250 centimètres de long du bout du museau à la base de la queue et possède une queue d'en moyenne 90 centimètres. Les mâles atteignent une masse comprise entre 145 et 225 kilogrammes à l'âge adulte.

African Lions | National Geographic Documentary - YouTube

Panthera leo melanochaita is a lion subspecies in Southern and East Africa. In this part of Africa, lion populations are regionally extinct in Lesotho, Djibouti and Eritrea, and threatened by loss of habitat and prey base, killing by local people in retaliation for loss of livestock, and in several countries also by trophy hunting.

Panthera leo melanochaita - Wikipedia

Lions are the largest of the African cat species, also known as a “Leeu” in Afrikaans,

iBubhesi”in Zulu or “Lowe”in German. Lions range in color from nearly white to ochre-brown, but tawny yellow is the most common color. Their faces have subtle tints and markings around the eyes, mouth and ears that enhance facial expressions.
