Selections from Pierre Duhem, *The Aim and Structure of Physical Theory* (Princeton Science Library edition, 1991, pp. 183-190). An Experiment in Physics Can Never Condemn an Isolated Hypothesis but Only a Whole Theoretical Group The physicist who carries out an experiment, or gives a report of one, implicitly recognizes the accuracy of a whole group of theories. Let us accept this principle and ...

Pierre Duhem, (born June 10, 1861, Paris, Fr.—died Sept. 14, 1916, Cabrespine), French physicist, mathematician, and philosopher of science who emphasized a history of modern science based on evolutionary metaphysical concepts. He maintained that the role of theory in science is to systematize relationships rather than to interpret new phenomena.

### **Pierre Duhem | French physicist and philosopher | Britannica**

"A physical theory is not an explanation. It is a system mathematical propositions, deduced from a small number of principles, which aim to represent as simply, as completely, and as exactly as possible a set of experimental laws." (p. 19). "[W]

recognize in a theory a natural classification, if we feel that its principles express profound and real relations among things," and thus "we shall ...
