

Algebra I
Chapter Test Review Part II

Name Kay
Date

Your chapter test on Friday will include a non-calculator section and a calculator section. Please bring a calculator with fully loaded batteries.

Samples of problems that can appear on the calculator-allowed section. Even though you are allowed to use a calculator, you are still expected to write out all the steps before you plug numbers into the calculator.

1. The average ACT score in the United States was 20.9 during the 2005 academic year. The average score of Vermont was 8.1% higher than the national average. What was the average ACT score for Vermont students?

$$\frac{20.9}{x} = \frac{8.1}{100}$$

$$x \approx 1.69$$

$$\text{Vermont score: } 20.9 + 1.69 \approx 22.6$$

2. According to a New York Times article last year, the Federal Reserve announced that there will be an average of 50% cut of bonus salary for CEO's of seven major companies (such as CitiGroup, Bank of America) from last year. If the bonus Bank of America's CEO was \$350,000 last year, how much will it be this year? Show your work *before* you use the calculator.

$$350,000 - 350,000 \cdot 50\% = 175,000$$

3. Coffee beans lose 12.5% of their weight during roasting. In order to obtain 252 kg of roasted coffee beans, how many kg of original unroasted beans must be used? Show your work.

$$x: \text{original} \quad \frac{x-252}{x} = \frac{12.5}{100}$$

$$12.5x = 100x - 25200$$

$$x = 288 \text{ kg}$$
