The text is a true classic! The image above illustrates linear equations, one of the topics covered in Algebra 1. Paul A. Foerster has taught mathematics at Alamo Heights High School in San Antonio, Texas since 1961. In that same year he received his teaching certificate from Texas A&M University.

### **Algebra 1 | Math Without Borders**

Paul Foerster wrote the best 2nd year algebra textbook I have ever examined or taught from. As a trained physicist and mathematician with an unusual and delightful sense of humor, Foerster develops the algebra by developing and illustrating the algebra skills in the context of functions. His applications are real-world, meaty and meaningful.

### **Algebra and Trigonometry: Functions and Applications ...**

Category Description for Foerster Algebra 1: This text is a one year, high-school algebra course that the author used in his own classroom. The first part of the book leads up to the Quadratic Formula by mid-year; this is a break from a more traditional sequence. As a result, students are able to work more realistic word problems using decimals.
