600 Tenth Edition, 1997 2.6 600-I-05/00 API 600 10th Ed section 2.6 requires that the strength of the stem at the Tee connection to the wedge be greater than at the root of the threads. Is testing required to prove this? API 600 does not define how to meet this requirement. Note that API 591 2nd Ed. Appendix B provides details of a stem-to-wedge connection test to confirm the failure location ...

API Standard 600

Valve pressure seal design was last included as Appendix A in API 600 Standard, 10th Edition, published February 1997. Appendix A covered gate valves, both Style A and Style B, but it was not exclusive; the industry used it for other valve types as well. This standard addressed the design using both API 600 as well as ASME B16.34 wall thicknesses. That was the last published pressure seal ...

This test is optional depending on size, class & type but on API 608 valves and API 600 gate valves it is always performed by GSL. 1. The valve inlet and outlet are closed off with flanges. 2. The valve is adjusted until the ball/disc is in a half open position. 3. The valve is filled with dry, clean and oil free nitrogen or air through the lower flange. If the air test pressure is above 10 ...
