I'd strongly recommend "Water Chemistry: An Introduction to the Chemistry of Natural and Engineered Aquatic Systems 1st Edition by Patrick Brezonik and William Arnold." It's expensive as hell but vastly better in teaching you the material. Also explore the plethora of online resources to help yourself and your fellow students. Band together if you get this text.

I took Aquatic Chemistry as a senior and had very little help from this book. There are few examples and there are no guided practice problems/solutions. That is good for the professor I guess since they don't have to worry about homework as much, but my chemistry books always have at least odd numbered problems with solutions and a solutions manual so you know whether or not you're doing the ...
