.NET Core Tutorials | Microsoft Docs

The one thing that didn't 'just work' was the async requirement of ASP.NET Core's output generation. The old code - which originally was written for .NET 1.1 and then moved through generations of .NET through 4.5+ - didn't use async output, so all the code at the middleware API 'seam' needed to be changed to async. It's not too difficult to do but it's a thankless task: Just when you think "I ...

Don't get burned by missing await Calls for Async Code in ...
