The lost Regiment series is a fabulous story set in the days of the American Civil War. It is basically the Civil War meets Planet of the Apes. It is one of those refreshing stories that no on has done before or since. The writing style is smooth and easy to understand, and the plot moves just right. A great series is one where the reader gets to grow with the characters and this one does just that.

Fans of the Lost Regiment series will undoubtedly enjoy this, as I did, but overall the characterizations aren't up to the high level of the earlier books. The basic story line rolls on, though, showing the development of the expanding Republic and the rise of regional politics as a factor in the unceasing war between humans and the Bantag. The battle action remains a highlight that Forstchen excels at, giving both a strong feel for the battle tactics as a whole and individual ...

Le Régiment perdu — Wikipédia

The Lost Regiment is a series of science fiction novels by William Forstchen. After the Battle of Gettysburg, the 35th Maine volunteer regiment is swept into a portal and lands on an alien world. The good news for them is that there are other humans on the planet — Russians, Romans, Carthaginians, Japanese, Chinese, and others — who entered the same way the 35th Maine did. The bad news is that they share the planet with the Hordes — a race of 9-foot tall aliens based on the Mongol ...

Boarding a transport ship after the Battle of Gettysburg, Colonel Andrew Keane and his 35th Maine regiment are swept into an alternate world. The first human civilization they encounter on this planet resembles medieval Russia, with boyars and priests ruling over the peasants and townspeople. Soon Keane and his regiment learn this world's terrible secret: that cannibalistic hordes of large, fierce Tugars circle the planet and demand tribute - including humans to be devoured.
