The Battle For Stalingrad recounts the author's time as a commanding officer defending the city from the invading German army. It can be a bit of a dry read when he discusses strategy and can be difficult to visualize without constant reference to a map. However, I believe it's the book's description of Russian tactics during the battle that the book shines describing the use of shock troops ...

### **Battle for Stalingrad: Vasili Ivanovich Chuikov ...**

Vassili I. Chuikov was the Russian general, commander of the 62nd Army, who successfully defended Stalingrad. He subsequently became commanding general of all Soviet land forces. The book is redolent of its Communist origins, but remains an insightful analysis of the tactics and history of the battle within the city.

The Germans, Chuikov noticed, grew dependent on air power. The Soviets would counter this by attacking or moving at night, and drawing the Germans to within grenade range, thereby making it harder for the Luftwaffe to identify targets. Stalingrad provided the perfect setting for this close-quarters approach.
