

Bill Nye The Science Guy!

Name _____

Phases of Matter

1. The Universe made is made of **Matter**.
2. Matter comes 3 ways, what we call phases. The three phases of matter are **Solid, liquid gas**.
3. Molten steel, melted steel, liquid steel, and solid steel are different because of **Energy**.
4. Getting things to change phases takes **Energy**.
5. If you want to turn a liquid into a solid you have to **take energy** away.
6. Where does the energy go from the things you put into a freezer? **The freezer removes it and releases it into the air around it. It pumps the heat out into the room!**
7. What do you get when you fry ice? A **solid** turns into a **liquid** into a **gas**. Those are some pretty **excited** molecules!
8. How cold is Liquid Nitrogen? **-196°C**, What percent of our air is Nitrogen? **78%**
9. The heat from the air makes molecules **move faster**, get **further and further** apart and change from a liquid to a gas.
10. Liquid Nitrogen makes molecules slow down, get **closer together**.
11. Now you know the three phases of matter. Solid like this **ice**, and liquid like this **water**, and gas like this **water vapor**.
12. Suppose there was no motion at all, the molecules are absolutely stopped. This is what scientists call **Absolute zero**. That would be colder than anything you could ever imagine!
13. Can you get to absolute zero? (Yes/No) **ABSOLUTELY NOT EVER!**
14. Solid, liquid, gas, three phases of matter. Solid, molecules are moving **slowly**, packed close together. Liquid, molecules are moving a little **faster**, they are able to flow a little bit. Gas, molecules are moving very **fast**, they're just wild! Three phases of matter!
15. How can you prove that invisible gas is matter? **Weigh it!**
16. When matter is in the gas phase, it takes the shape of its **container**. When matter is in the liquid phase, it takes the shape of its **container**. When matter is in the solid phase it **holds** its shape.
