

SBI3U – Biology  
Evolution Unit Test

Name: \_\_\_\_\_  
Date: \_\_\_\_\_

Multiple Choice: Questions  
Short Answer: Questions  
Total of 7 Pages

**Multiple Choice** Identify the letter of the choice that best completes the statement or answers the question. [1 mark each]

- Which statement does not reflect Darwin's theory of evolution by natural selection?
  - Excess numbers of individuals are produced in each generation.
  - All members of a population have an equal opportunity to reproduce.
  - Members of the same population must compete for essential resources to survive.
  - Resources in the environment are limited.
  - Population levels tend to remain unchanged.
- Which process does not contribute to the variability of a population over time?
  - random mating
  - gene flow
  - mitosis
  - mutation
  - geographic separation
- What key concept about population growth did Malthus contribute to Darwin's thinking?
  - Populations grow linearly.
  - Populations grow exponentially.
  - Populations grow without limit.
  - Populations grow arithmetically.
  - none of the above
- What might happen to a species of insect if it lacked sufficient genetic variation to adapt to a changing environment?
  - It might acquire genes through evolution.
  - It might become extinct.
  - It might evolve into a less complex form.
  - It might evolve into a more complex form.
  - It might mutate to acquire appropriate genes.
- What is required for natural selection to occur?
  - variation within a species
  - variation between species
  - some artificial means of selecting traits
  - no change in environmental conditions
  - all of the above
