Katherine Blundell is a Professor of Astrophysics at the University of Oxford and a Research Fellow at St John's College, Oxford. Her research interests include extreme energy phenomena in the Universe, including black holes, astrophysical jets, relativistic plasmas, and active galaxies.

### **Black Holes: A Very Short Introduction (Very Short ...**

Black holes have to be amongst the most fascinating phenomena of astronomy/cosmology and as such make a perfect topic for a new addition to OUP's vast collection of pocket guides, the 'very short introduction' books. I read my copy on a couple of 45 minute train journeys - it's long enough to give a good grounding in the basics of black holes, without being heavy or over-technical.

### **Black Holes: A Very Short Introduction by Katherine Blundell**

Black holes are a constant source of fascination to many due to their mysterious nature. Black Holes: A Very Short Introduction addresses a variety of questions, including what a black hole actually is, how they are characterized and discovered, and what would happen if you came too close to one. It explains how black holes form and grow—by stealing material that belongs to stars—as well ...

Previously, she held a Royal Society University Research ...

### **Katherine Blundell - Wikipedia**

Professor Katherine Blundell looks at the seemingly paradoxical, mysterious, and intriguing phenomena of black holes. Outlining their nature and characteristics, both those resulting from the spectacular collapse of heavy stars and the giant black holes found at the centres of galaxies, she separates scientific fact from science fiction and demonstrates the important role they play in the cosmos.
