### **Boa Constrictor | National Geographic - Animals**

A Boa is any one of several different species of snake in the Boinae subfamily. In fact, scientists recognize at least 31 different species of boas. The most well-known of these snakes is the Boa Constrictor, also known as the Red-Tailed Boa. Read on to learn about the Boa Constrictor.

### **Boa Constrictor - Complete List of Animals - Animals Network**

The boa constrictor is named for its mode of predation: constriction. Instead of injecting poison into its prey, it strikes, grabs and squeezes until the prey is subdued. Once the prey is dead, the snake swallows it whole. Boa constrictors are able to adjust their hunting behaviors according to the density of possible prey items in their habitat. In most cases, they are ambush predators, meaning they sit and wait for a desirable prey item to pass by. However, if food is scarce, they become ...

### **Boa constrictor | Smithsonian's National Zoo**

The boa constrictor (Boa constrictor), also called the red-tailed boa or the common boa, is a species of large, non-venomous, heavy-bodied snake that is frequently kept and bred in captivity. The boa constrictor is a member of the family Boidae, found in tropical South America, as well as some islands in the Caribbean.

The Argentine boa constrictor (Boa constrictor occidentalis) is silvery gray with an unusual network pattern. The boa constrictor is active from dusk to dawn, feeding on a wide variety of birds and mammals. It is mostly terrestrial but climbs into trees in search of birds. In daytime it shelters in tree hollows, old logs, and animal burrows.

### **boa constrictor | Description, Size, Subspecies, & Facts ...**

Native to Central and South America, boa constrictors are non-venomous snakes that can grow to up to 13 feet in length as adults. Boa constrictors are ambush hunters, meaning they hide until their prey is within reach, then strike with lightning speed to constrict their food--monkeys, other reptiles, and wild pigs--before swallowing their prey whole. Although a formidable hunter, the boa constrictor has several major predators. Exploring these enemies of the boa constrictor is key ...

### **Enemies of the Boa Constrictor | Animals - mom.me**

Enemies of boas include eagles, hawks, caimans, alligators, and humans. In most cases, it's young boas that are hunted down by bigger animals as they are devoid of care from their mother right from birth. Boa constrictors are non-venomous. This means that their defense mechanisms do not include the release of venom to ward off threats.

### **What Are The Predators of Boa Constrictors?**

Le Boa constrictor (Boa constrictor) est une espèce de serpents de la famille des Boidae. Anciennement appelé Boa devin ou Aviosa, c'est un très grand serpent que l'on rencontre à l'état sauvage uniquement sur le continent américain.
