Régulateurs & Débitmètres massiques | Bronkhorst

Bronkhorst controllers and indicators are great instruments to control the flow of gasses and liquids. These instruments can be addressed through various protocols such as DeviceNet™, Profibus-DP ®, Modbus or FLOW-BUS. This document describes a LabVIEW driver for direct communication with FLOW-BUS devices.

We offer an extensive product range of thermal, Coriolis and ultrasonic flow meters and controllers for low flow rates of gases and liquids. Our flow instruments are used for a variety of applications in laboratory, machinery, industrial and hazardous areas. By sharing our knowledge and closely cooperating with OEM customers in the field we develop customer specific low flow solutions, e.g. of ...

FlowPlot is a software application for monitoring and service purposes on Bronkhorst digital instruments. It gives good insight in the dynamic behaviour of meters and controllers and allows adjustment of controller, alarm and counter settings. While plotting, the software tool can store the measured data in a comma separated file (CSV), thus serving as a data logger. FlowPlot is a DDE client ...

controller type 3 (MBC3) is introduced in 2011. It is built around a 72MHz 32 bit NXP ARM controller. It has AD and DA controllers on board which makes it possible to measure noise free and control valves without delays. The internal control loop runs 6 times faster compared to the MBC-II therefore control stability has improved significantly. It also has several improved functions like reverse
