Building Skin On Frame Boats

Skin on Frame Boatbuilding Method. Skin on frame refers to a method of boatbuilding that has been around for a very long time. Typically a light frame often made of wood is assembled. This is then covered by a waterproof membrane. The resulting boat is light and economical of material

Skin on frame boat building. Kayak and Ultralight boatbuilding

Skin-on-frame boat building is not like conventional boatbuilding where there might be one best way to get out a plank or one strongest way to frame a hull. There is no plotting, forms, or lofting involved. When we examine historic kayaks and skin canoes one discovers that construction techniques varied widely both geographically and temporally.
