

21. Figure 15-5 illustrates the three major fluid compartments of the body. Arrows indicate direction of fluid flow. First, select three different colors and color the coding circles and the fluid compartments on the figure. Then, referring to Figure 15-5, respond to the statements that follow. If a statement is true, write *T* in the answer blank. If a statement is false, change the underlined word(s) and write the correct word(s) in the answer blank.

- Interstitial fluid
- Intracellular fluid
- Plasma

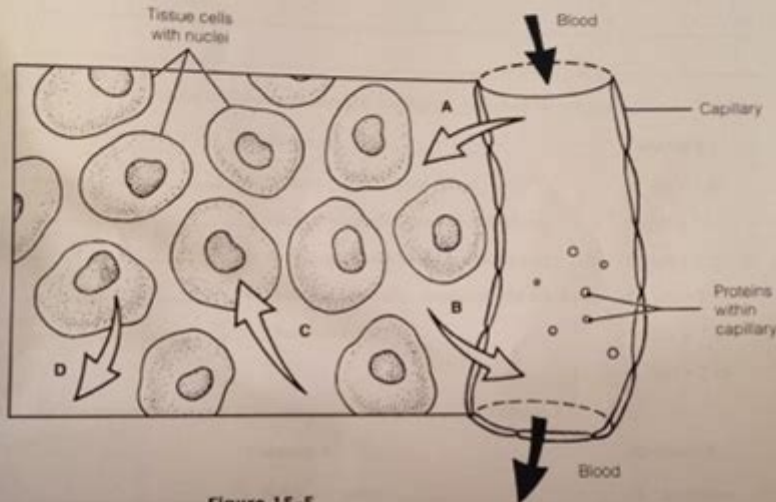

Figure 15-5

- _____ 1. Exchanges between plasma and interstitial fluid compartments take place across the capillary membranes.
- _____ 2. The fluid flow indicated by arrow A is driven by active transport.
- _____ 3. If the osmolarity of the ECF is increased, the fluid flow indicated by arrow C will occur.
- _____ 4. The excess of fluid flow at arrow A over that at arrow B normally enters the tissue cells.
- _____ 5. Exchanges between the interstitial and intracellular fluid compartments occur across capillary membranes.
- _____ 6. Interstitial fluid serves as the link between the body's external and internal environments.
