Cisco Macro Analysis

You can create macros to run a series of commands on a Cisco switch. This can be handy if you're logged in to a remote device and want to change the configuration, but doing so will mean you lose management access part-way through. You can define a macro and run it; even though you lose management access part way through, the macro will continue to run.

Business Analysis Cisco has recently lost a significant part of its market share, and its revenue growth has flattened. The core reasons for these problems are the emergence of strong competing products, and the bureaucratization of Cisco. Those two trends are not new: the first one was already strong in 2008, and the bureaucratization of Cisco started earlier, around 2005. Major issue: Is the ...

So before I joined my current employer, a cisco-phone macro(I believe) was put into place, so that when a Polycom VOIP phone was connected, it would automatically put the VOIP phones into our voice VLAN. All other network devices would be placed on the data VLAN. The switch that this macro is on is an older Cisco Catalyst 2960G and 2960 S. Problem is, I have not used macros before and need to ...

Applying a Smartport macro to a Cisco network interface is as easy as creating a macro. You can apply a macro to either a single interface or a range of interfaces. When you apply a macro to an interface range, the macro is individually applied to each interface in the range, sequentially. Even if the macro fails to be applied to an interface, the processing will continue on the other ...
