City Stars Arthur C Clarke

Aside from the 2001 series and one of the Rama books I have read little of Arthur C Clarke's works and in a way I'm glad to be able to come to a masterwork like this fresh and new. The City and the Stars Review - Arthur C. Clarke | Summary

Even a billion years in the future, humankind can fall into relatively dark ages where life falls into static patterns and man's spirit withers. In "The City and the Stars", Arthur C. Clarke envisions mankind having fallen into two cultural niches, each limited by their own approaches to life.

One of those is another classic that I picked up as part of the SF Masterworks series, Arthur C. Clarke's 1956 novel The City and the Stars. As I've noted before, I have been playing "catch-up" with science fiction, as horror is my usual area of interest, so I am not extremely familiar with the great works of a lot of the classic authors.

The City and the Stars is one of my favorite Clarke novels. It centers on Alvin, the first child born in ten million years in Diaspar, the city of the title, the last city on Earth. He's a "unique" rather than someone reborn from the Hall of Creation, and unique in wanting to go beyond the bounds of the city.

- Arthur C. Clarke, The City and the Stars "Faith in one's own destiny was among the most valuable of the gifts which the gods could bestow upon a man, but Alvin did not know how many it had led to utter disaster." - Arthur C.
