You use this process to manage data flow and data conversion between the Loan Management (CML) in the ERP environment and Collateral Management (FS-CMS). This process enables you to use the loan data for mortgage loans maintained in CML, as the receivable master data. The standard system uses the receivable master data in the collateral agreement-receivable assignment. This assignment determines the amount that can be secured for the receivable.

### **Collateral Management with SAP CMS: configuration and user ...**

Collateral management began in the 1980s, with Bankers Trust and Salomon Brothers taking collateral against credit exposure. There were no legal standards, and most calculations were performed manually on spreadsheets. Collateralisation of derivatives exposures became widespread in the early 1990s. Standardisation began in 1994 via the first ISDA documentation. In the modern banking industry ...
