### **Computer graphics using OpenGL - Philadelphia University**

Computer Graphics Hardware GPU (Graphics Processing Unit) Modern day computer has dedicated Graphics Processing Unit (GPU) to produce images for the display, with its own graphics memory (or Video RAM or VRAM). Pixels and Frame. All modern displays are raster-based. A raster is a 2D rectangular grid of pixels (or picture elements). A pixel has two properties: a color and a position. Color is ...

### **3D Graphics with OpenGL - The Basic Theory**

Computer graphics is a very appealing field of study. You learn to write programs that create pictures, rather than streams of text or numbers. Humans respond readily to pictorial information, and are able to absorb much more information from pictures than from a collection of numbers. Our eye-brain systems are highly attuned to recognizing visual patterns. Reading text is of course one form ...
